

07043 notebook mouse instructions:

The parts:

Opening the mouse to gain access to the batteries:  
Press the button on the top to release the battery cover.

Slide the battery cover off the mouse and insert the batteries:

Slide the battery cover back on the mouse to secure the batteries.

Insert the USB receiver into an available USB port.

Momentarily press the round button on the top.  
Don't hold this button down, just press it and release it.

You should see the light start to blink.

Turn the mouse upside-down and find the little round black button.

Press the little round back button on the bottom-side of the mouse.

You may have to use a pen or a straightened paper clip to press the button. Don't hold this button down, just press it and release it right away.

You should see the red light on the bottom of the mouse flicker off and back on again.

Your mouse is now ready to be used.
